### White Gloss Spray

- Spray or splatter desired bases with White Gloss Spray. In the finished pages in the guide, the gloss spray has been splattered by taking the cap off the bottle and tapping the sprayer tube over the pages. It does not take long to dry, so you can splatter each page as you work on it.
- You will also remove the sprayer tube to make white dots on some pages. Simply touch the end of the spray tube to paper to create a circle. It's okay if they are not perfect. It's a fun technique!
