Project 3	3	2	-	-	1

Getting Started:

- Gather all materials needed.
- Trim all zip strips and set aside. The zip strip is the ½" accent paper along the top of each sheet of patterned paper.
- Check the cut orientation below each cutting guide image. This will show you how to cut the paper, keeping the patterns on your project pieces facing the right direction.
- Light grey pieces on your cutting guide are scrapbooking project pieces. Dark grey pieces are treat container project pieces. White pieces are leftover paper.
- As you cut your paper, label and sort the pieces as indicated in the cutting guide, creating a stack for each project.
- If there is a fold line present in a cutting diagram, cut the paper first before folding it. In order to die-cut two shapes at once, place the die on top of the folded paper or stack two paper pieces before running the paper through your die-cutting machine. Paper pieces that can be stacked for die-cutting will be labeled, "stack."

Key:

✂ = first cut | * = use back of paper | P = Project
