## Getting Started:

- Gather all materials needed.
- Light grey pieces on your cutting guide are project pieces. White pieces are leftover paper.
- As you cut your paper, label and sort the pieces as indicated in the cutting guide, creating a stack for each project.
- If there is a fold line present in a cutting diagram, cut the paper first before folding it. In order to die-cut two shapes at once, place the die on top of the folded paper pieces before running the paper through your die-cutting machine. Paper pieces that can be stacked for die-cutting will be labeled, "stack."

## Key:

✂ = first cut | \* = use back of paper | P = Project

— — — — = cut line

..... = fold line

cut diagonal = angle in trimmer

■ = suggested Thin Cuts arrangement
